

Clean Energy Plan for Michigan

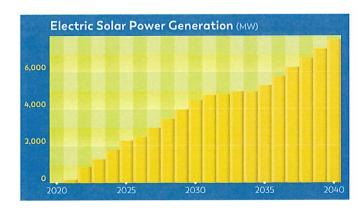

Our Clean Energy Plan is a 20-year strategic road map to meeting the state's energy needs while protecting the environment. We want to eliminate coal, give customers more control to reduce energy waste and dramatically boost the amount of electricity we generate from clean, renewable sources.

That's why we're planning to add 8,000 megawatts of competitively bid, utility-scale solar power by 2040.

We plan to own 50 percent of the additional solar capacity and purchase the remaining half from solar developers through a competitive bidding process for all new solar projects to ensure customers receive maximum value.

Why solar? In addition to its environmental benefits, solar is increasingly cost competitive with other fuel sources.

We can also add solar gradually, providing flexibility to respond to emerging needs, adapt to changing conditions and embrace new technology — without betting on a big power plant.

Powering Michigan's Energy Future: We plan to add 8,000 megawatts of utility-scale solar energy to offset additional coal plant retirements and expiring power purchase contracts.

Strategic Solar Growth

Each year, we're adding more clean, renewable, solar-generated electricity to our portfolio.

In 2021, for example, we announced plans to purchase 140 megawatts of solar power — enough to serve about 70,000 residential customers — from the Calhoun Solar Center in Calhoun County.

We also announced plans to purchase and operate the Mustang Mile Solar Energy center, a 150-megawatt project in Lenawee County to come online by the end of 2022.

We plan to add 1,100 additional megawatts of utility-scale solar through a competitively bid request for proposal (RFP) process to come online between 2022 and 2024.

Up on the Rooftop

We support business and residential customers who want to invest in rooftop solar generation and want to make it easy for them to connect to our system.

Our popular net metering program, which served thousands of customers in Michigan, is transitioning to a new distributed generation (DG) model in 2021. The DG program will roughly double the opportunity for customer participation.

To learn more, send an email to EnergyPurchase@ cmsenergy.com.

While utility-scale solar projects may provide the most effective solutions, DG projects will play a role in Michigan's energy future and we're here to help.

Solar Gardens Makes It Simple

Our Solar Gardens program allows you to promote a cleaner energy landscape without the upfront costs and long-term maintenance of owning your own solar energy system.

Here's how it works:

- You subscribe to your desired number of solar "blocks," each containing ½ kilowatt of solargenerated electricity.
- We generate the solar energy at plants located at Cadillac, Western Michigan University and Grand Valley State University.
- You support clean energy going to the electric grid and pay a small fee on your monthly energy bill.
- You receive credit for the solar energy produced.

What if the sun doesn't shine?

A fair question, especially in Michigan. We're counting on battery technology to help us store electricity generated by solar and other renewable energy sources.

We'll save it for those times when solar production is challenging to help meet demand for power on the grid.

We're already piloting batteries in Grand Rapids and Kalamazoo. Battery storage — along with emerging tools such as energy efficiency and demand response — will help us optimize customer demand.

For the first time, we'll have the ability to eliminate waste and produce the precise amount of power Michigan needs.

DID YOU KNOW?

As of late 2020, our Solar Gardens power plants had generated nearly 6,500 megawatt-hours of electricity. That's the equivalent environmental benefit of planting 41 acres of trees.

Michigan's Moonshot: Harnessing the Sun

Consumers Energy, landowners can work together to reap solar power benefits

We're asking you to help us lead Michigan's historic clean energy transformation.

We recently announced our Clean Energy Plan, a landmark 20-year blueprint to meet our state's energy needs while protecting the environment we all cherish.

That's why we're planning to add 8,000 megawatts of competitively bid, utility-scale solar power by 2040 — when solar power will comprise more than half of our electric capacity.

Reaching the goals of our Clean Energy Plan will make Michigan a better place to live, work and play for generations to come. But we won't get there without your help.

Generating large amounts of clean, renewable solar energy requires large tracts of land, and we're searching for tens of thousands of acres in Michigan. Your land may play a key role in the clean energy transformation.

See back to learn more about what solar expansion means for Michigan — and for you.

We're planning to add 8,000 megawatts of competitively bid, utility-scale solar power by 2040.

Learn more about solar and how we can work together.

Answers to Your Questions About Solar Expansion

Why is Consumers Energy sold on solar?

In addition to its environmental benefits, solar is increasingly cost competitive and we can add it gradually to meet Michigan's changing energy needs without building a large, new fossil fuel power plant. We've already begun adding more clean, renewable, solar-generated electricity for Michigan and plan to bring 1,100 megawatts of solar capacity online by 2024. We plan to own 50 percent of this additional solar capacity and purchase the remaining half from solar developers, who also are often seeking to buy property of leasing rights.

What does this opportunity mean for Michigan landowners?

Earmarking your land for solar can provide revenue to create a wide variety of options. Utility-scale solar projects can provide income for participating landowners from the sale of property or ongoing easement agreements. Solar also can increase a community's revenue to help fund education and critical basic services.

How much land is needed for solar and where are the best locations?

Generating solar energy requires significant tracts of land — between five and 10 acres per megawatt of electricity — that's flat, open and treeless with direct access to the sun. That said, we expect to meet our solar energy targets using less than 2 percent of the farmland in Michigan. We're considering potential locations such as farm fields — including those less ideal for growing crops — brownfield sites and state and recreational lands. Distance to existing transmission infrastructure is also a critical factor for solar developments. The closer, the better. Lack of access or long distances to high-voltage transmission and distribution can increase costs and other siting issues.

How does a solar array affect property values?

The presence of solar does not appear to make a significant impact for landowners or neighbors. Property values are determined by a wide variety of factors, including the preferences of individual buyers, making it difficult to draw general conclusions.

Does a landowner have to sell all property to participate in a solar project?

Not necessarily. Though we prefer to purchase land, our goal is to meet Michigan's property owners where they are to start a conversation about mutually beneficial solar solutions. While some may feel ready to sell their acreage, others may want to keep working portions of their property, lease easement rights or discuss how to buy back land if technology advances reduce operational footprints or solar production ceases decades from now.

How does a solar project affect the land?

New solar installations have minimal impact on land. Topsoil is left in place and solar array sites are seeded with native grasses and pollinating plants to promote biodiversity. Land can generally be used for a variety of purposes, including farming, after serving as a solar installation.

What's the impact on the environment and local wildlife?

Protecting the planet is one of our top priorities and solar is a responsible environmental choice that highlights our commitment to Michigan's ecosystem. Solar panels don't leach or emit any harmful chemicals into the soil or the air and aren't expected to negatively affect local wildlife. We'll complete a detailed environmental inventory of the project area and will work with landowners and applicable federal, state and local agencies to consider all environmental concerns. This includes identifying and protecting any threatened or endangered species and their habitats.

How will solar impact electric reliability for Michigan?

As optimistic as we are about the future of solar energy, we understand the sun doesn't always shine — especially in Michigan. That's one reason our Clean Energy Plan also includes the proposed purchase of four existing natural gas-fired power plants. These existing plants — along with our current natural gas power plants in Zeeland and Jackson — will supply reliable, on-demand electricity to meet Michigan's energy needs when renewables such as solar and other sources are not available.

How does a solar array impact my neighbors?

Solar panels have minimal impact for nearby residents. Their visual profile is minimal — particularly compared to wind energy. Panels are installed strategically to reduce any visible glare and don't impact internet, phone, or satellite services. Solar panels do not make any noise. There can be a low humming noise associated with electrical equipment connecting solar panels to the grid, but sound studies are performed before and after construction to ensure noise is at acceptable levels defined by local zoning ordinances.

DEXTER TOWNSHIP AGENDA ITEM SUMMARY

MEETING OF: Township Board of Trustees 19 July 2022

MILETING OF. TOWNSHIP Board of Trustees 15 July 2022
Agenda Item: Sale of 6900 Dexter Pinckney Road
Sale of 6500 Dexter Finckney Road
Recommended by:
Diane Ratkovich
Fiscal or Resource Considerations: YES NOx
Does this agenda item require the expenditure of funds? YES NOx_
If YES, are funds budgeted? YES Recommending for 2022/23 YES NO _x Are staff or other resources required? YESx_ NO
Is a budget amendment required? YES NOx
15 d baaget amenament required.
The home appraised at
Recommend listing it on Zillow and Realtor.com as For Sale by Owner with pictures
Recommend lock box on house for RE agents to show it and pay a 3percent buyer agency fee.
Recommend potential buyers without RE agent retain an agent or a lawyer to represent them is
the purchase. (Other ideas?)
If house is not under contract in 2 weeks, then we list with a realtor. How do we choose?
Staff Comments:
Motion/Action/Recommendation:
Motion to market 6900 Dexter Pinckney Road as For Sale by Owner, per plan.

Subject: film plastic/ polystyrene support

To the Dexter Township Board,

Washtenaw County Solid Waste Division (WCSW) supports the polystyrene and plastic film recycling program being considered tonight.

A study run by the Washtenaw Regional Resource Management Authority with support of my division in 2021 with ~150,000 residents found that plastic film was the number one material (by frequency) that contaminates recycling. To divert the material, residents need to know where to put the material besides the regular recycling stream where it causes problems by getting stuck in recycling materials facility gears, causes operational and safety challenges. The program under consideration would help to remove this material from the recycling stream. The material when source separated is most commonly used for composite decking (Trex is the largest company I'm aware of that uses this as recycled material feedstock).

While personally I think polystyrene (Styrofoam) is a material that we should try limit the use of in favor of other renewable products, I found when I bought and outfitted my house, accumulating the material was unavoidable. This is another material that doesn't belong in the recycling stream and is difficult to get rid of for consumers. Residents I've spoken to want a place to recycle the material. One of the larger challenges with polystyrene is that it is so light, making it a material with a high greenhouse gas equivalent for transportation for much of the USA. As DART is relatively close, the impact of transportation is smaller for our County than for the average American.

As we support the program, WCSW is willing to financially support the program through our sponsorships program. As we believe this initiative will help us to achieve our County Solid Waste Plan goals and because we believe it is a valuable service to residents, we'll provide a funding match of ½ the costs the bins up to a \$4,000 match.

Sincerely,

Theo Eggermont

Dexter Township Resolution # 22-654

A resolution to set the 2022 Dexter Township millage rates.

Whereas, State Law requires that Dexter Township annually set the millage rates for Allocated and Voted millages, and;

Whereas, the millage rates are based on the Taxable Value of ALL Properties in Dexter Township as of 5/31/2022, and;

Whereas, the Dexter Township allocated and voted millages are limited in accordance with the provisions of the "Headlee" tax limitation amendment to the Michigan Constitution, and:

Whereas, On August 7, 2018, the voters in Dexter Township approved a renewal of a Fire millage with an increase of "up to 2.4 mills" for a term of five years, commencing with the 2019 tax year, and;

Whereas, On August 7, 2018, the voters in Dexter Township approved a renewal of a Police millage of "up to 1.4199 mills" for a term of five years, commencing with the 2019 tax year, and;

Whereas, because the millages were approved by the voters prior to the year in which they expired, they were subject to the "Headlee" tax limitation amendment to the Michigan Constitution during the first year of collection;

Now therefore be it resolved, the Dexter Township Board, by a vote of the majority at a regularly scheduled and duly noticed meeting held this 19th day of July, 2022, sets the Dexter Township 2022 tax-year millage rates as follows:

- 1. Allocated Operating Millage: **0.7708** mills (reduced from 0.7733)
- 2. Voted Fire Millage: 2.3543 mills (reduced from 2.3619)
- 3. Voted Police Millage: 1.3903 mills (reduced from 1.3948)

·········

The undersigned, being the duly appointed and acting Clerk of the Township of Dexter hereby certifies that the foregoing resolution was duly adopted at a regular meeting of the Dexter Township Board at which a quorum was present on the 15th day of September, 2020, and that the members voted thereon as hereinbefore set forth.

Michelle	Stamboulellis,	Clerk

DEXTER TOWNSHIP BOARD Supervisor's Report July 19, 2022

The Dexter Township Board Meeting is conducted in a respectable manner where each of us will wait until we are called upon to speak. We will listen while others are speaking with an open mind towards possibilities and solutions. We will respect one another's opinion, even when it is different from our own. We will stay focused on the policy matters before us and the solutions that contribute to the quality of life in Dexter Township.

There was a gathering Friday, July 1st at the Main Fire Station to say goodbye to Chief Smith as he begins his retirement. It was well attended.

Master Plan, reminding everyone to fill out the on-line survey.

Respectfully Submitted, Diane Ratkovich

Dexter Township

Performance results are shown net of all fees and expenses and reflect the reinvestment of dividends and other earnings. Many factors affect performance including changes in market conditions and interest rates and in response to other economic, political, or financial developments. Investment involves risk including the possible loss of principal. No assurance can be given that the performance objectives of a given strategy will be achieved. Past performance is no guarantee of future results. Any financial and/or investment decision may incur losses.

Huron River Watershed Council (HRWC)

July 2022 Report to Dexter Township

To the Dexter Township Board of Trustees:

- 1. Michigan's current fish consumption advisories are at
 - a. https://tinyurl.com/4vd5xjpk See page 74 for Washtenaw County
- 2. HRWC is moving offices to downtown Ann Arbor. If you are meeting with them, be sure to ask about location
- 3. The HRWC DE&I Committee is interested in expanding the representation of the whole community and is developing recommendations on how to do so. If you know of a farmer who might be interested in advising them, please let Sue Bade know.
- 4. Meet the Huron River; from HRWC website 7/05/22

Meet the Huron River! We've got three summertime paddle trips planned . . . and YOU are included.

Bring your own watercraft or rent equipment at a discount for an "out and back" paddle trip exploring a unique section of the Huron River National Water Trail. Prior to launch, HRWC staff and local experts will give a short talk on the river's ecology, history and features.

Each trip is limited to 25 participants, advance registration required. Exact location details will be sent to participants upon registration.

- · Sunday, June 26, 5-8pm, Argo Pond Ann Arbor
- . Thursday, July 21, 5-8pm, Proud Lake, Milford
- · Tuesday, August 16, 5-8pm, Oakwoods Metropark, New Boston

Learn more about each location and register at HuronRiverWaterTrail.org/Events,

Questions? Contact Allie Schneider aschneider@hrwc.org.

5. Prevent Algal Blooms in our waterways

Please let me know if you would like more information: sbade@dextertownship.org

Respectfully submitted, Suzanne Bade

Dexter Township Representative to HRWC
